

SYNKROS® Progressive Management™

AMP THE EXCITEMENT, AT THE TOUCH OF A DIAL.

SYNKROS® Progressive Management™ gives casinos the power to launch integrated, centralized progressive jackpots, with no additional in-game hardware, no additional network connections, required.

AT-GAME DISPLAYS

In addition to SYNKROS sign kit displays, SYNKROS also supports real-time display of SPM at the game machine through the True-Time Display. Players can discover available awards and receive SPM win notifications through the game machine's center LCD player tracking display.

STANDARD PROGRESSIVES

Casino teams can leverage SPM for standard progressives, managed through traditional EGM pay table progressives. This includes support for linked progressives and floor wide progressive management. Wins are determined by each EGM.

MYSTERY PROGRESSIVES

With Mystery Progressives delivered by SPM, wins are randomly determined by the system. Each mystery bonus level can be configured exclusively to all players, carded players only or to a specific card tier. Mystery Progressive meters also include "must hit by" amounts.
